PROFILE

Developer and IT professional working across responsive web experiences, practical software, Linux systems, self-hosted services, networking, and infrastructure. Builds and maintains complete systems with a focus on reliability, usability, and clear documentation.

PROFESSIONAL EXPERIENCE

NOV 2025 - JAN 2026

IT / Web Developer

Telework

Worked across IT support and web development responsibilities within the scope of the role.

JAN 2025 - AUG 2025

IT - Full-time

Hospitality / IT Environment

Handled computer configuration, networking, room access point setup, troubleshooting, and basic infrastructure support.

PERIOD NOT SPECIFIED

IT

Hundredfold Digital

Supported the organization's technical environment in an IT role.

SELECTED PROJECTS

- HomeLab-OS - Real-time network operations dashboard for self-hosted infrastructure, with Proxmox integration and WebSocket telemetry.
- HomeLab-Agent - Modular Linux telemetry service for hardware, Docker, disk, service, and network health data.
- CompressMe - Cross-platform Python image compression and duplicate-detection tool with GUI and CLI workflows.
- MovieFlix - Self-hosted private streaming platform with media scanning, HTTP range streaming, and FFmpeg transcoding.

CORE CAPABILITIES

- Web and full-stack development
- Python tools and automation
- Linux server administration
- Docker and Proxmox
- Networking and monitoring
- Self-hosted infrastructure
- Technical support
- Security studies

TECHNOLOGY

HTML, CSS, JavaScript, Python, Java, React, Next.js, TypeScript, Node.js, SQLite, PostgreSQL, Git, GitHub, Bash, ZSH, Nginx, Docker, Linux, Proxmox, Tailscale, WordPress

EDUCATION

Bachelor of Science in Hospitality Management

2024 - 2025

ACHIEVEMENTS

- Youth Leadership Award, 2024 - 2025
- NC II Bartending, 2023
- NC II Bread and Pastry, 2024

CURRENT FOCUS

- Building a first server cluster
- Network architecture and service communication
- Information security and penetration testing
- Open-source software and homelab operations
