

JOHN DE JOYA

J0hnvexcoder / Web Development & Infrastructure

Philippines | johnangelodejoya@gmail.com | +63 933 104 5271
johnvexcoder.github.io | github.com/johnvexcoder

PROFILE

Web developer and IT enthusiast building practical software and self-hosted systems. Hands-on work spans Linux, Docker, Proxmox, networking, and technical support. Technical skills developed through independent study, experimentation, and open-source projects.

PROFESSIONAL EXPERIENCE

IT / Web Developer | Telework

November 2025 - January 2026

IT (Full-time) | Hospitality / IT Environment

January 2025 - August 2025

Computer configuration, networking, room access point setup, troubleshooting, and basic IT infrastructure support.

IT | Hundredfold Digital

SELECTED INDEPENDENT PROJECTS

HomeLab-OS - Real-time infrastructure dashboard with WebSocket telemetry, topology mapping, and Proxmox integration; includes a simulated demo fleet.

HomeLab-Agent - Modular Linux telemetry agent that reports host, hardware, Docker, disk, and network data to HomeLab OS.

CompressMe - Cross-platform Python image compression tool with a PySide6 GUI and CLI, batch processing, and duplicate detection.

MovieFlix - Self-hosted media platform with local media scanning, HTTP range streaming, and FFmpeg transcoding.

TECHNICAL TOOLKIT

Development: HTML, CSS, JavaScript, Python, Java, Next.js, SQLite, Git / GitHub

Infrastructure: Linux, Docker / Compose, Proxmox VE, Nginx, Tailscale, WordPress

EDUCATION & CURRENT FOCUS

Bachelor of Science in Hospitality Management | 2024 - 2025

Building a first server cluster; studying network architecture, service communication, information security, and penetration testing.

ACHIEVEMENTS

Youth Leadership Award, 2024 - 2025

NC II Bartending, 2023 | NC II Bread and Pastry, 2024
